

THE ELECTRONIC INOUT BOARD

FOR MAC AND WINDOWS NETWORKS

"InOut is a terrific product; well thought out and well executed."

— Bill Bristow
MacWorld Australia

How often do you go searching for someone only to find them away from their desk? Do you ever need to know the best way to contact an outside sales person? What if you could locate an employee for an important matter without leaving your desk? With InOut Tracker your questions are answered. No more running around the office, or interrupting other employees when you need to locate someone.

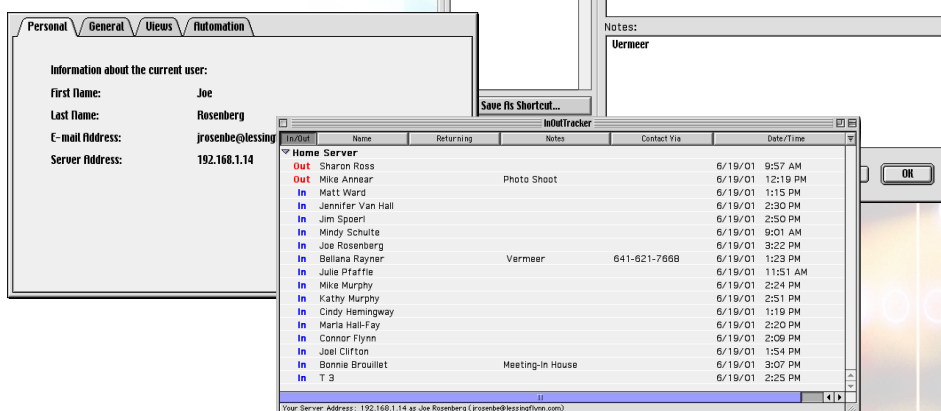

WHAT IS INOUT TRACKER?

InOut Tracker is a people tracking tool that works across your TCP/IP network. With an easy to use interface and simple set up, your employees can locate one another in a hurry. Gain instant access to the in/out status of employees or co-workers. Find out when they will be returning, or the best way to contact. InOut Tracker will even launch your favorite POP3 e-mail client if that is the preferred method of contact. Get InOut Tracker — stop searching and keep working.

STAY ON TOP OF BUSINESS.

People and resources are critical assets to the success of your business. InOut Tracker is the perfect tool to help you manage those assets. Whether you need to know if your

IT Manager is in his office or out doing maintenance, or where a piece of equipment is. InOut Tracker means you can spend more time getting things done and less time finding the people to do it.
